

PowerlineServices

Sun Electric provides a full scope of construction and maintenance services for electrical transmission and distribution systems up to and including 500kV. Our primary focus is on two end-markets: overhead high-voltage transmission line construction and maintenance through 500kV, and turnkey EPC construction of 34.5kV wind farm gathering systems and transmission line infrastructure up to 345kV.

We can rapidly mobilize our fleet of equipment and support vehicles across a wide geography and our skilled transmission crews have developed a history of providing our clients with high quality performance and a proactive attitude towards both safety and quality.

Experienced, Reliable and Stable - Sun Electric has stood the test of time since 1981.
