

WindPower

Sun Electric has been constructing wind energy for over 25 years. In 1984, Sun installed a 60 kW wind turbine, the first AC induction wound wind turbine in Texas, at Surfside on the Texas coast. More recently, Sun has been active in providing EPC construction services for some of the most prominent wind developers, owners and utilities in the country.

Sun has become a leading provider of turnkey EPC construction services of 34.5kV wind farm gathering systems and complete transmission line infrastructure up to 345 kV. We have continually proven our capabilities in the wind energy construction industry by executing projects with efficiency and safety.

Experienced, Reliable and Stable - Sun Electric has stood the test of time since 1981.
